Summary

Currently completing my end-of-studies internship at Inria Bordeaux and studying at the Ecole Nationale Supérieure de Cognitique (ENSC), I am set to graduate as an engineer later this year. I am actively seeking a PhD position in Artificial Intelligence, with a specific focus on LLMs and agentic AI. Having completed several research internships both in France and abroad, I am eager to continue in this field. This path will allow me to further fuel my curiosity while actively contributing to the advancement of AI knowledge

Experience

Inria (Institut Nationale de Recherche en Informatique et en Automatique)

Bordeaux, France

Agentic AI

Mar. 2026 - Present

- Engineered a framework-less AI agent from first principles to support and accelerate PhD research workflows.
- Designed and implemented a custom Retrieval-Augmented Generation (RAG) pipeline alongside diverse tool-use functionalities to enhance the agent's reasoning and execution capabilities.
- Designed and implemented an interactive web interface to facilitate seamless user interaction with the AI agent.
- Conducted a rigorous comparative benchmarking of various open-source LLMs deployed locally

Karunya University

Coimbatore, Tamil Nadu,
India

Research intern in RL

Jun. 2025 - Sep. 2025

- Designed and implemented two distinct navigation approaches for an autonomous indoor hospital robot: a classical deterministic path-planning algorithm and a reinforcement learning-based navigation model.
- Conducted a comparative analysis between the algorithmic and reinforcement learning models.
- Successfully deployed and optimized the reinforcement learning model onto an embedded Raspberry Pi

Skills

FullStack	Next, Node.js, MongoDB, FastApi, REST API, Docker
Programming	Python, JAVA, C#
AI	Agentic AI, LLM, RL, Deep learning, RAG
Languages	French(native), English(7.5 ielts), basics in Spanish

Education

ENSC (Ecole Nationale Supérieure de Cognitique)

Bordeaux, France

Engineer in AI and Cognitive Science

2023 - 2026

- Acquired a strong foundational background in general engineering, computer science, and signal processing, with a core focus on cognitive sciences.
- Specialized in Artificial Intelligence during the final year, focusing on advanced topics such as NLP, Large Language Models (LLMs), Reinforcement Learning (RL), and Deep Learning architectures (RNNs).

Classes Préparatoires aux Grandes Écoles (CPGE)

Brest, France

Two-year Intensive Undergraduate Program in Mathematics and Physics (equivalent of a Bachelor degree)

2021 - 2023

- Acquired a rigorous and high-level foundation in advanced Mathematics, Physics, Computer Science, and Engineering Sciences.
- Successfully prepared for the highly selective nationwide competitive entrance examinations for French Engineering Graduate Schools (Grandes Écoles).
